

services include: general contracting, design/build, project management, consulting, and business development. In addition, as a company that is committed to protecting the environment, F & R has been an integral part of the first sustainable and LEED design projects built in Puerto Rico.

But according to Fullana, in the early days, just following the trends was how the three brothers stayed buoyant. “We are always adjusting to the emerging markets,” he says. “At the beginning of the company, everything that was done in Puerto Rico was high-rises. So, we specialized in high-rises. In the early ‘90s, high-rises were no longer done, so we went into single-unit housing. When the recession came, we went into government building.”

Also, when the last recession came, F & R needed to survive. Fullana says the company
