

this system has been, and continues to be, one of the company's most popular and effective waste removal services.

The management and staff of Waste Disposals (2003) Ltd. pride themselves in giving a superior quality and cost-effective service to its clients. A large portion of the company's success has come from the close partnerships it has developed with its suppliers and customers. In order to increase the value of its customer service, in 2009, the company began installing GPS tracking devices on all its service vehicles. This tracking system allows it to manage its operations more effectively and has dramatically improved its customer database and route management. It also increases its employee's productivity, eliminates excess overtime, and reduces fuel costs.

Waste Disposals (2003) Ltd. is also committed to

AT A GLANCE
