

Carlisle Bay Resort

A modern caribbean classic offers its guests simple, discreet luxury

Set on a sleepy horseshoe bay on Antigua's scenic, lush, and undeveloped southern coast, and surrounded by volcanic mountains and an emerald green rain-forest, the Carlisle Bay Resort is an award-winning, 5-star hotel that is sophisticated and contemporary in style, and known by its guests for its unpretentious, yet elegant and detailed customer service.

According to Resort Manager, Andrew Barlow, the property was originally developed in 2001, by the Ireland-based construction company, Harcourt Developments, and became a hotel two years later. Over the

years, Carlisle Bay has grown and expanded with the addition of new suites, restaurants, and amenities. Approximately 65 percent of its guests hail from the United Kingdom, followed by the U.S. and other markets.

The resort has no regular guestrooms; all of its 82 accommodations are suites. By day, every room is filled with sunshine from sea-facing, floor-to-ceiling windows opening onto private terraces and balconies, with many rooms leading directly onto the beach. Others have lawn and far-reaching ocean views. Some suites work best for couples; others are for families.
